PROFESSIONAL SUMMARY

B.Tech Computer Engineering (AI) student with hands-on experience building AI-powered web applications, machine learning models, and workflow automation systems. Skilled in Python, Flask, NLP, SQL, and AI automation using n8n and Google Gemini. Delivered end-to-end projects spanning recommendation systems, spam detection, and API-driven automation pipelines. Seeking an entry-level AI/ML or Software Engineering role to apply strong problem-solving skills and a passion for building scalable, real-world AI solutions.

EDUCATION

Ganpat University

B.Tech in Computer Engineering (Artificial Intelligence)

2023 – 2027

CGPA: 6.03/10

TECHNICAL SKILLS

Programming Languages: Python

Web Technologies: HTML, CSS, Flask

Libraries & Frameworks: Pandas, NumPy, Scikit-learn

Databases: SQL, MySQL

AI & Automation: n8n, Prompt Engineering, AI Workflow Automation, Google Gemini API, NLP

Tools & Platforms: Git, GitHub, Google Colab, Linux

PROJECTS

MoodFlix – Movie Recommendation System | *Flask, Python, Pandas*

- Engineered a content-based movie recommendation engine in Flask, processing a dataset of **5,000+ movie records** to generate personalized suggestions for users.
- Designed and implemented an interactive, responsive user interface that reduced average movie discovery time and improved user experience.
- Deployed the full-stack application on a Linux-based hosting platform, ensuring reliable public accessibility.

AI Spam Email Detection System | *Flask, NLP, Machine Learning*

- Built a full-stack spam detection application by implementing TF-IDF vectorization with a Multinomial Naive Bayes classifier for real-time email classification.
- Developed an admin dashboard with scan history and analytics, enabling continuous monitoring of model predictions.
- Improved classification accuracy and reduced false positives through optimized text preprocessing and feature engineering.

LinkedIn AI Automation Platform | *n8n, Gemini AI, Gmail API, LinkedIn API*

- Architected an end-to-end AI content automation workflow using n8n and Google Gemini, integrating Gmail and LinkedIn APIs into a single pipeline.
- Automated content generation, approval routing via Gmail, and direct publishing to LinkedIn, cutting manual posting effort by an estimated **70%**.
- Coordinated multiple third-party API integrations to deliver a reliable, hands-off content publishing system.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Tata – GenAI Powered Data Analytics Job Simulation (2025)

Tata – TCS iON Career Edge: Young Professional (2025)
