Career Objective

B.Tech CSE (AI) student with hands-on experience in building AI-powered web applications and workflow automation solutions using Python, Flask, Machine Learning, and n8n. Passionate about AI Agents, Prompt Engineering, and developing scalable AI-driven software that solves real-world problems.

Education

B.Tech in Computer Engineering (AI), Ganpat University 2023 – 2027

Technical Skills

Programming — Python

Web — HTML, CSS

Libraries — Pandas, NumPy, Scikit-learn

Database — SQL, MySQL

Tools — GitHub, Google Colab

AI & Automation — n8n, Prompt Engineering, AI Workflow Automation

Projects

MoodFlix – Movie Recommendation System (Flask, Python)

- Developed a Flask-based movie recommendation platform using Python and Pandas for personalized content suggestions
- Implemented recommendation logic and user-focused interface design for improved user interaction
- Deployed the application and handled dependency/configuration issues in Linux-based deployment environments

Spam Email Detection System (Flask, NLP, Machine Learning)

- Developed a full-stack spam email detection application using Flask, Machine Learning, and NLP techniques
- Implemented TF-IDF vectorization with supervised learning models for real-time spam classification
- Built interactive dashboards with scan history tracking, admin analytics, and threat monitoring features
- Improved prediction accuracy through model tuning and optimized text preprocessing workflows

Certificates

Generative AI Professional Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Tata - GenAI Powered Data Analytics Job Simulation — 2025

Tata - TCS iON Career Edge - Young Professional — 2025
