

Galla Jagadeesh

Guntur, Andhra Pradesh, India | +91 9106390609 | jagadeesh.galla20@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

B.Tech Computer Engineering (Artificial Intelligence) student with hands-on experience building AI applications, machine learning systems, and workflow automation solutions. Skilled in Python, Flask, NLP, SQL, n8n, AI Agents, Prompt Engineering, REST APIs, and Google Gemini. Experienced in developing end-to-end automation pipelines integrating GitHub, Bright Data, Google Sheets, Gmail, and LinkedIn APIs.

EDUCATION

Ganpat University

2023 - 2027

B.Tech, Computer Engineering (Artificial Intelligence)

Technical Skills

- **Programming:** Python, C
- **Web:** HTML, CSS, JavaScript, Flask
- **Libraries:** Pandas, NumPy, Scikit-learn
- **Databases:** SQL, MySQL, SQLite
- **AI & Automation:** n8n, AI Agents, Prompt Engineering, AI Workflow Automation, NLP, Google Gemini
- **APIs:** REST APIs, GitHub API, Bright Data API, Google Sheets API, Gmail API, LinkedIn API
- **Tools:** Git, GitHub, Google Colab

Work Experience

Freelance

Jul 2026 - Present

Full Stack Developer

Remote

- Developed and deployed MAKKMAL, a luxury e-commerce website for a client using Next.js, TypeScript and Python/FastAPI.
- Built key features including authentication, payments, cart, checkout, orders and admin panel.
- Integrated PostgreSQL, Supabase, APIs and email services, and handled responsive design and production deployment.

PROJECTS

Saarthi-AI – AI Sales Intelligence Platform [GitHub](#)

- Developed an AI-powered sales intelligence platform that automates company research and generates contextual pre-meeting briefings for sales representatives.
- Built a full-stack Flask application with secure authentication, SQLite integration, and a responsive dashboard for meeting and briefing management.
- Integrated n8n workflows to automate company research, news collection, and AI-generated insights including company overview, key products, and suggested talking points.

LinkedIn Automation AI – Human-in-the-Loop AI Content Automation [GitHub](#)

- Built an n8n-based AI content automation workflow that converts user topics into structured LinkedIn posts using Google Gemini.
- Implemented human-in-the-loop Gmail approval with approve, regenerate, and reject paths before LinkedIn publishing.
- Designed a feedback-driven revision agent that regenerates content based on user feedback and routes approved drafts for publishing.

Project Archaeologist – Multi-Agent GitHub Revival Analyzer [GitHub](#)

- Built a multi-agent n8n workflow that analyzes public GitHub repositories and reconstructs project history, architecture signals, documentation quality, and incomplete features.
- Designed specialized AI agents for project history, code health, documentation analysis, incomplete-feature detection, and revival planning.
- Integrated GitHub APIs to collect repository metadata, commits, issues, file paths, and README content as structured evidence for AI analysis.

LinkedIn Job Finder Automation [GitHub](#)

- Built an n8n-powered job discovery automation that converts search criteria into structured LinkedIn job leads using the Bright Data LinkedIn dataset API.
- Implemented automated snapshot polling, result retrieval, filtering, and structured job storage in Google Sheets.
- Integrated n8n Form Trigger, HTTP Request, IF, Filter, Wait, and Google Sheets nodes into an end-to-end job search pipeline.

AI Spam Email Detection System [GitHub](#)

- Built a full-stack spam detection application using TF-IDF vectorization and Multinomial Naive Bayes for real-time email classification.
- Developed an admin dashboard with scan history and analytics and applied text preprocessing and feature engineering to improve classification performance.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional
- GenAI Powered Data Analytics Job Simulation (2025): Tata
- TCS iON Career Edge: Young Professional (2025): Tata
